DATE: 17 December 2009

SUBJ: TCB EVENT SECURITY

TO: Whom It May Concern

The Lincoln County Communications Agency (LinCom) has worked with law enforcement agencies throughout our county in providing a Professional, Timely, Accurate, and Compassionate service to our citizens, visitors and law enforcement officers, another partner we work with in providing security and protective services in Lincoln County is TCB Management Group. Of particular note is the security service they provide at our annual Seafood and Wine Festival. This event brings tens of thousands to our community many of them college students, to attend the event. As you well know, combining alcohol with a young population presents many challenges to our law enforcement/security community. The staff of TCB met with our local agencies and together they came up with strategies to head off any problems which could arise.

TCB Management Group has been a partner in Public Safety in Lincoln County for several years, while I noted their work during the annual Seafood and Wine Festival, they have also supported our efforts to suppress criminal activity by being seen patrolling our community. Often they come upon accident scenes or evidence of criminal activity and notify our Dispatch Center and remain on scene until law enforcement officers arrive. I've found them to be very proactive and always giving the full measure to our community. They have a great relationship with our other law enforcement partners and continue to grow their relationship by participating in many events within our community.

Richard W. Glasgow, Director
Lincoln County Communications Agency
